Skills

Programming Python, JavaScript, C++, Go, TypeScript, SQL, R, HTML, CSS

Tools Node.js, React, Flask, Express.js, Docker, Git, InfluxDB, PostgreSQL, Redux, Material UI

Experience

Software Engineer Intern

Google

Waterloo, ON

Aug. 2024 - Nov. 2024

- Research on statistically guaranteed Gemini-assisted virtual machine telemetry configurations in GCP.

Software Engineer Intern

Netflix

Bay Area, CA

May 2024 - Aug. 2024

- Deployed an **Node.js SDK** and **tooling** to all **500+** supported internal JavaScript apps, enabling complete **observability** by collecting crucial code health insights on every change.
- Pioneered an automated campaign which flagged code change issues, driving compliance across over **10** monorepos.
- **Accelerated** support ticket resolution roughly **20 minutes** by instantly logging insights previously parsed by humans.

Full Stack Software Developer

Arcturus Networks

Remote

May 2023 - Aug. 2023

- Spearheaded the **alpha launch** of our Embedded Computer Vision Surveillance app in **React** which increased product exposure and interest among **40 industry leaders** and over **500 potential customers**.
- Enhanced the **Computer Vision** algorithm by incorporating **object-oriented design in C++**, introducing **20+ user-configurable parameters** that provide full range of controls and low-latency updates.
- Built a dynamic statistics dashboard by expanding **REST APIs** and using **socket.io** to display vital time series data from **InfluxDB** and **PostgreSQL**, optimizing graph algorithms and queries that **accelerated data retrieval** by **45%**.

Performance Analyst

Desjardins

Remote

Jan. 2022 - Apr. 2022

- Shared over **10 scripts** in **SQL** and **SAS** that streamlined data manipulation **saving 25%** more time.
- Optimized financial investments of over **\$50,000** by delivering data-driven insights from large-scale datasets.

Projects

Journal Vision 📺

- Engineered a full stack video gallery search app using **React**, **Flask**, **Python**, **scikit-learn**, and Google Cloud APIs.
- Developed an efficient video timestamp retrieval system that analyzes cosine similarity across audio and visual data, winning **2nd place** at The GoldenHack.

Visual Scroll Article: Explore the STEM Gender Gap 📺

- Designed a scrollytelling article using **React** and **TypeScript** that explores the STEM gender gap across the world.
- Created **7 interactive data visualizations** using **D3.js** that allow users to explore the data with custom widgets.

Waterloo Data Science Club Website 📺

- Launched the club website using **React** and **Next.js** while leveraging **Git** for version control across the team.
- Accelerated future updates by **50%** using **JavaScript** and **APIs** to dynamically cast data and automate social media.
- Implemented **Material UI**, **SASS**, and React components in design decisions to contribute **high quality code**.

Leadership

Frontend Engineer 📺

Hack the North

Waterloo, ON

Mar. 2023 - Present

- Launched a user-friendly Hacker Application website, securely **hosting 6,000+ applications** for our 2023 event.
- Engineered **QR code-enabled digital tickets** on web, Apple wallet, and Google wallet which **automated registration for 1,800+ attendees**, yielding a **67% reduction** in sign-up time.
- Built the Hack the North website and dashboards using **React** and **TypeScript** for **1,000+ hackers** and **50+ sponsors** generating over **25,000 visitors** in 2 months.

Education

University of Waterloo & Wilfrid Laurier University

Bachelor of Computer Science & Bachelor of Business Administration

Waterloo, ON

2020 - 2025

- Relevant Coursework: Data Structures, Algorithms, Object Oriented Software, Operating Systems, AI, Networks
- Languages: English (Native), French (Fluent), Spanish (Fluent), Mandarin Chinese (Beginner)
